

ROASTED FULL FAT SOY, HEAVY ROAST (ROSY-H)

Grits, Meal, Flour

Heavy roasted full fat soy ingredients are produced from cleaned whole soybeans. The process utilizes dry milling technology which involves roasting, dehulling, and milling into various particle sizes. Roasting the soybeans before milling inactivates the enzymes, stabilizes the fats, and results in a strong nutty flavor profile. The roasting is a validated kill step.

NPI makes its ROSY-H ingredients directly from whole, dehulled non-GMO soybeans using only natural processing methods. In addition to being highly functional, ingredients made with whole soybeans contain all the natural oils (fats) that are found in the soybean. And because no chemicals are used in our processing, each product retains all of the natural nutrients and phytochemicals of the whole soybean.
